* Clinically tested by Drug Monitoring Research Institute - (DMRI),
Effect of Mamalait on milk production in mothers of newborns: a randomized, double-blind, placebo-controlled trial.
Study Number: DMRI/GAL0306 Dated: 12/02/2006

Dietary Supplement to Improve and Increase Lactation

Benefits of MAMALAIT[®] GRANULES

- The herbs in **MAMALAIT[®] GRANULES** are carefully selected and combined to strengthen the formula proven to promote and enrich mother's milk. The primary herb Shatavari, offers targeted benefits for its galactagogue effect, while the supporting herbs reinforce the benefits of the primary herb.
- This Herbal formulation is prepared from herbs which contain richest mixtures of phytochemicals, alkaloids and bioflavonoids that offer a unique blend which helps in maintaining holistic health of both, the lactating mothers and their infants
- This formulation has been developed on the basis of ancient Ayurveda principles.
- Additionally, it aids in general debility, boosts energy that in turn improves and increases immunity.

Each 100 g of **MAMALAIT® GRANULES** contain extracts derived from

SHATAVARI (Asparagus Racemosus)	15g
KSHEER VIDARI (Ipomoea Digitata)	1g
GOKSHUR PANCHANG (Tribulus Terrestris)	2g
YASHTIMADHU (Glycyrrhiza Glabra)	1g
JEVANTHI (Leptadenia Reticulata)	1g
JEERA (Cuminum Cyminum)	1g
SOWA (Anethum Sowa)	1g
KALONJI (Nigella Sativa)	1g

Per day nutritional value of MAMALAIT® GRANULES	
Content	Value of 10g x 2 Servings
Energy Value	83.98kcal
Proteins	384.00mg
Carbohydrates	18.44g

Iron	0.61mg
Potassium	38.20mg
Sodium	15.56mg
Calcium	4.64mg
Magnesium	0.94mg

- **MAMALAIT® GRANULES** is a dietary supplement that is commercially available as 250 g granules packed in high density polyethylene bottles.
- Mothers are recommended to start taking **MAMALAIT® GRANULES** immediately after delivery and continue during the course of breastfeeding. However, for early benefits mothers can also consider taking **MAMALAIT® GRANULES** two months prior to delivery.

Dosage

- The standard recommended dose of **MAMALAIT® GRANULES** includes reconstituting one tablespoon (Approx. 10 g) of granules in a glass of water, fruit juice or milk with stirring. Mothers are advised to take no more than 2 servings per day.
- **MAMALAIT® GRANULES** should not be reconstituted in boiling water or milk.

Storage

- **MAMALAIT® GRANULES** should be stored in a cool and dry place in a tightly closed bottle to avoid moisture absorption responsible for lump formation.
- However, the lumps (if formed) can be easily broken up and does not affect the quality and efficacy of the product.
- The shelf life of **MAMALAIT® GRANULES** is 36 months from the date of manufacture.

Advantages of using MAMALAIT® GRANULES:

A Unique Bond between the Mother and the Child is created from day one of breast-feeding.

- **MAMALAIT® GRANULES** also helps in maintaining holistic health of both the lactating mothers and their infants.
- **MAMALAIT® GRANULES** has been tested to be free from Escherichia coli, Salmonella and Fungal contaminants.
- Heavy metals in this formulation are within permissible limits making it absolutely safe for the mother and the child.
- Along with the main component Shatavari, appropriate quantities of additional balancing herbs are present to rejuvenate the body of the lactating mother by rendering additional benefits to the formulation.
- So far, no side effects have been reported as a consequence of using **MAMALAIT® GRANULES**

Conclusion

- Breast Milk is a natural and wholesome food for an infant, owing to its health benefits, thus, ensuring adequate supply of nutritious milk is important.
- In Ayurveda, there are special herbs known to promote healthy lactation.
- In **MAMALAIT® GRANULES** the carefully selected herbal combination can promote and enrich mother's milk.
- While Shatavari, (the primary herb) is used for its galactogogue effect, the supporting herbs reinforce the benefits of the primary herb and provides additional support to maintain the health of the mother and their infants.
- The mothers do not have to depend on powder milk and the feeding bottles which incur additional cost and is not safe for the child.
- The bonding between the mother and the child is an experience which is unique and comes only with breastfeeding.
